Career opportunity for the position of Cybersecurity Specialist

Position Description

As a Cybersecurity Specialist, you will work closely with Cybersecurity Architects, other Cybersecurity personnel and projects to ensure solutions are implemented as architected. This will include reviews of low-level designs from the project, producing low level security designs and the collection of evidence to ensure solutions are secure as designed.

Key Responsibilities

- Provide Cybersecurity Engineering and other relevant cybersecurity expertise as required.
- Work with Cybersecurity Architects as well as other project and cybersecurity personnel to ensure the controls called as called out in the Security Designs are properly implemented.
- Gather and document evidence that the controls are in place and are configured correctly.
- Formally document Cybersecurity Implementation Plan and Low-Level Security Architecture Diagrams for solutions.
- Ensure that all relevant Cybersecurity input and decisions for projects are formally documented and stored in the relevant locations.
- Ensure the successful handover of all relevant cybersecurity project documentation to the relevant stakeholders including Cybersecurity Risk.

Experience & Qualification

Essential

- Minimum of 7+ years' relevant experience, including 3+ years' in an IT or cybersecurity lead role
- Relevant 3rd level degree or equivalent work experience
- Excellent planning and organisational skills
- Excellent interpersonal and communication skills
- Ability to influence technical discussions and decisions
- Familiarity with IT Service Management processes
- Knowledge of security controls covering domains including Identity, Networks, Endpoints, Cloud, Applications, Data and Security Monitoring
- A high level of attention to detail with an ability to identify solutions in complex and demanding situations

Desirable

- A keen interest in cybersecurity, keeping up to date with the latest trends and knowledge of cybersecurity industry standards and frameworks
- Understanding of frameworks such as ISO 27001/2, SOC, NIST, or COBIT
- Understanding of current regulatory and legal requirements – e.g. NIS Directive and GDPR
- Experience with cloud services, particularly Azure and Microsoft365
- At least one cybersecurity-focused industry certification such as a CSA, CISSP, CISM, CISA, and GIAC certifications (or to attain an agreed certification during role)

Salary

€35,000 - €40,000 depending on experience

Closing Date

25th October 2024
